SUMMARY

AI & ML undergraduate with a strong foundation in Artificial Intelligence, Machine Learning, Natural Language Processing, Computer Vision, and Deep Learning fundamentals. Experienced in building end-to-end Python projects spanning data preprocessing, model development, and deployment. Proficient in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, and Database Management Systems. Passionate about applying AI-driven solutions to real-world problems.

EDUCATION

Bachelor of Technology in Artificial Intelligence & Machine Learning

St. Thomas College of Engineering & Technology

Expected Graduation: 2027

CGPA: 8.41 / 10 (through 6th semester)

ISC (Class XII) – CISCE

St. Paul's Boarding & Day School

2023

Percentage: 90.25%

ICSE (Class X) – CISCE

St. Paul's Boarding & Day School

2021

Percentage: 96.6%

PROJECTS

AI Gym Coach

github.com/ballari514/AI-GYM-Coach

- Developed an AI-based fitness coaching system using computer vision and pose estimation to analyze human body movements during workouts in real time.
- Extracted and processed body keypoints and joint-angle features using MediaPipe and OpenCV to identify exercise movements and evaluate workout posture.
- Implemented ML-based movement classification and rule-based form analysis for exercises such as Squats, Push-ups, Biceps Curls, Shoulder Press, and Lunges.
- Built real-time repetition counting, set tracking, and posture feedback to help users maintain correct exercise form and monitor workout performance.

SmartAttend

github.com/ballari514/SmartAttend

- Developed an AI-powered smart attendance system using Computer Vision, Face Recognition, and Voice Authentication for automated attendance tracking.
- Built a full-stack web application with secure authentication, database integration, and real-time attendance management.
- Implemented AI-based identity verification to reduce proxy attendance and improve accuracy through intelligent automation.

TECHNICAL SKILLS

Programming Languages Python, Java, HTML, CSS, JavaScript (basics)

Machine Learning & AI Supervised & Unsupervised Learning, Classification, Regression, Model Evaluation, Deep Learning (basics), NLP

Data Visualization Matplotlib, Seaborn

Data Analysis & Cleaning NumPy, Pandas, Scikit-learn

Databases MySQL

Core CS Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Tools & IDEs GitHub, Jupyter Notebook

CERTIFICATIONS

- Machine Learning Using Python – SimpliLearn SkillUp (View Certificate)
